

Grandir Data Quality: Executive Summary

Objective: Analyze data quality and availability to determine feasibility of the 'Grandir Central Command'.

Total Candidates: 42681

Total Jobs: 1147

Key Findings:

- Data Completeness: Significant gaps in 'Diplôme' and Contact Info.
- Data Consistency: 'Diplôme' field contains free-text with high variability.
- Geolocation: Zip codes are the primary location key; validity needs checking.
- Process: High volume of candidates in early stages ('Présélection').
